The amendment received April 22, 2004 has been made of record. Claims 1-21 are pending.

The rejection under 35 USC 103 over Anderson contained in the previous office action is withdrawn in view of applicant's arguments.

Claims 7 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Each of the claims recites a "density" for the alumina with units of g/cm^2 . These units are not appropriate for density nor are the numerical values appropriate for the density of alumina of any origin.

Claims 1, 4, 7-9, 11, 13, 15, 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kwan et al.

This rejection is maintained substantially as set forth in the previous office action. Applicant's arguments are not persuasive. The reference is seen as providing sufficient guidance to produce aqueous compositions comprising polyurethane, fumed alumina and water in relative proportions such as claimed instantly.

Claims 2, 3, 5, 6, 8, 10, 12, 14, 16 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 20 and 21 are allowed.
